1 Pages

1.1 index.html

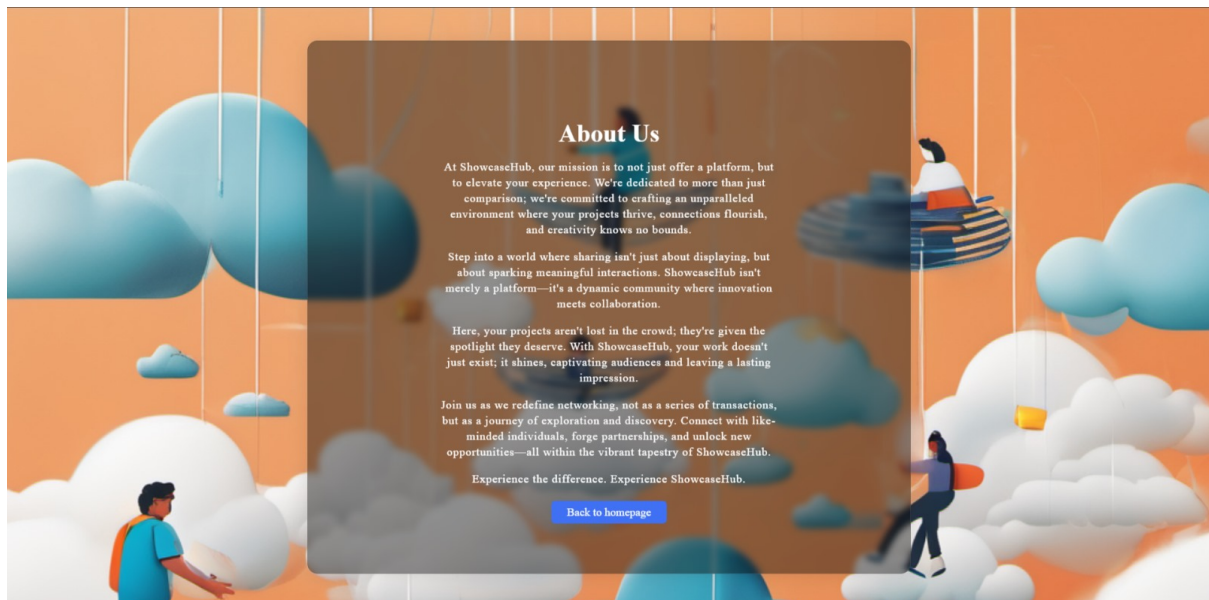

This HTML document represents the home page of a website called ShowcaseHub. The page starts with a video background to welcome users. In the header, there's the ShowcaseHub logo and name along with a button to register. The navigation bar provides links to the home page, about page, and contact page. At the bottom of the page, there's a copyright notice for ShowcaseHub, updated for the year 2024.

1.2 register.html

A registration form titled "Registration" is displayed on a dark background. The form contains several input fields: "Full Name" (placeholder: "Enter your name"), "Username" (placeholder: "Enter your username"), "Email" (placeholder: "Enter your email"), "Phone Number" (placeholder: "Enter your number"), "Password" (placeholder: "Enter your password"), "Confirm Password" (placeholder: "Confirm your password"), "Country" (placeholder: "Enter your country"), and "Enter Your Birthday" (placeholder: "Enter your birthday"). There are also radio buttons for "Gender" (Male, Female, Prefer not to say) and a multi-select dropdown menu for "Interests" (placeholder: "Choose a language"). A blue "Register" button is at the bottom.

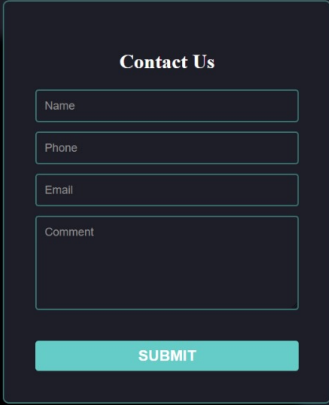

This HTML document presents a registration form for users, featuring various input fields such as full name, username, email, phone number, password, country, and birthday. Additionally, it includes radio buttons for selecting gender and a multi-select dropdown menu for choosing interests. jQuery is employed for form validation, allowing users to register only with valid inputs, while also integrating features like input masking for phone numbers, auto-completion for the country field, and a date picker for selecting the birthday.

1.3 about.html

This page contains a temporary description about us and a background image.

1.4 contact.html

A contact form titled "Contact Us" is centered on a dark blue background. The form is a light gray rectangle with rounded corners. It contains four input fields stacked vertically: "Name", "Phone", "Email", and "Comment". The "Comment" field is a larger text area. Below the fields is a red "SUBMIT" button. The form has a subtle drop shadow.

This HTML document contains a contact form through which visitors can contact ShowcaseHub. The form allows information such as name, phone number, e-mail address and comment to be entered and when the send button is pressed, this information is sent as an e-mail. jQuery mask and validation plugins have been used to add auto-formatting and form validation functionality to the phone number field, improving user experience and ensuring data accuracy.

2 jQuery Plugins and jQuery UI Used

2.1 jQuery Plugins

- **Form Validation:** Used for validating user input in the registration and contact forms, ensuring that only valid data is submitted.
- **Mask:** Employed for adding auto-formatting to the phone number field in both registration and contact forms, enhancing user experience.
- **Chosen:** Integrated for enhancing the multi-select dropdown menu in the registration form, providing a better user interface for selecting interests.

2.2 jQuery UI

- **Date Picker:** Implemented for enabling users to easily select their birthdate in the registration form, enhancing usability.
- **Autocomplete:** Utilized for providing auto-completion functionality in the country field of the registration form, improving user experience by suggesting country names as users type.
